INDEX TO SUBJECTS

Anesthetic block, local, of sodium channels in normal and pronase-treated squid giant axons 285
Arsenazo III, changes of intracellular Ca^{++} measured by, in relation to potassium permeability of human erythrocyte ghosts 463
Axon, squid giant, temperature effects on gating currents in 479
—, squid giant, normal and pronase-treated, local anesthetic block of sodium channels in 285

Bacterial photosynthesis, picosecond dynamics of electron-transfer processes in 207
Bacteriorhodopsin, picosecond and steady state, variable intensity and temperature emission spectroscopy of
—, primary intermediates in photochemical cycle of 375
Batrachotoxin and yohimbine interaction 219
Bend propagation in flagella, derivation of equations of motion and their simulation 41
Birefringence measurements of structural inhomogeneities in *Rana pipiens* rod outer segments 59
Black lipid bilayer membranes, formation from glyceryl monooleate dispersed in squalene 337

Calcium^{++}, intracellular changes in, measured by arsenazo III 463
Cardiac and nerve membranes, sodium conductance measured by V_{max} 153
— and nerve tissues, sodium current measured by V_{max} 147
κ-Caseins, cow and sheep, prediction of conformation 323
Cell, Chinese hamster, enhancement of postreplication repair in ultraviolet light-irradiated by irradiation in G_2 or S-phase 71
—, flat, orienting in flow systems 1
—, living, fluorescein excitation and emission polarization spectra in, changes during cell cycle 395
—, mammalian, after ultraviolet irradiation, model for postreplication repair in 247
Cesium, internal, altering sodium inactivation in *Myxicola* 473
Chemical-physical basis of protection of slowly frozen human erythrocytes by glycerol 101
Chemotactic, migrating, bands of *Escherichia coli*, quasi-elastic light scattering 15
Circular dichroism studies of E. coli ribosome protein S4 359
Conductance, sodium, in nerve and cardiac membranes measured by V_{max} 153
Cortical depression, spreading, mathematical model for 257
Current, sodium, measured by V_{max} in cardiac and nerve tissues 147
—, gating, in squid giant axon, temperature effects on 479
Cytometry, flow, hydrodynamic orientation of sperm heads for 7

Density measurements and molecular interactions in lecithin bilayers 159
Dichroism studies, circular conformational prediction and ribosomal protein S4 from *Escherichia coli* 359
Dynamics of ventricular wall and observations on blood flow 219
—, picosecond, of electron-transfer processes in bacterial photosynthesis 207

Elastic, quasi-, light scattering from migrating chemotactic bands of *Escherichia coli* 15
Electrical properties of skeletal muscle fiber containing helicoidal T system 277
Electron transfer reactions to endergonic reactions, molecular mechanism of energetic coupling of, sequence of 451
—-transfer processes in bacterial photosynthesis, picosecond dynamics of 207
Endergonic reactions, molecular mechanism of energetic coupling of sequence of electron transfer reactions to 451
Enzyme catalysis, shear deformation effects, metal ion effect in shear activation of urease 121
Epithelial potassium active transport system of insect midgut, pump-mediated efflux in 313
Erythrocyte flow and dynamics of ventricular wall 233
— ghosts, human, changes of intracellular Ca^{++} as measured by arsenazo III in relation to potassium permeability 463
—, human, frozen slowly in concentrations of glycerol, temperature dependence of survival 89
—, human, slowly frozen by glycerol, physical-chemical basis of protection 101
Escherichia coli, quasi-elastic light scattering from migrating chemotactic bands of 15
—, ribosomal protein S4 from, conformational prediction and circular dichroism studies on 359
Excitation and emission, fluorescein, polarization spectra in living cells, changes during cell cycle 395

Fiber, skeletal muscle, containing helicoidal T system, electrical properties 277
Flagella, bend propagation, derivation of equations of motion and their simulation 41

Flagella, sperm, equation of motion for 177
Flow cytometry, hydrodynamic orientation of sperm heads for 7
— systems, orienting flat cells in 1
Fluorescein excitation and emission polarization spectra in living cells, changes during cell cycle 395
Frozen human erythrocytes by glycerol, physical-chemical basis of protection 101
— human erythrocytes in concentrations of glycerol, temperature dependence of survival 89

Gating currents in squid giant axon, temperature effects on 479
Gelation, sickle hemoglobin, reaction order and critical nucleus size 129
Glycerol, physical-chemical basis of protection of slowly frozen human erythrocytes by 101
—, temperature dependence of survival of human erythrocytes frozen slowly in concentrations of 89
Glyceryl monooleate dispersed in squalene, formation of black lipid bilayer membranes from 337

Helicoidal T system, electrical properties of skeletal muscle fiber containing 277
Hemoglobin gelation, sickle, reaction order and critical nucleus size 129
Human erythrocyte ghosts, changes of intracellular Ca^{++} as measured by arsenazo III in relation to the potassium permeability 463
— erythrocytes frozen slowly in concentrations of glycerol, temperature dependence of survival 89
— erythrocytes, slowly frozen by glycerol, physical-chemical basis of protection 101
Hydrodynamic orientation of sperm heads for flow cytometry 7
Hydrogen exchange from folded proteins, models for 79

Ion effect, metal, in shear inactivation of urease 121
Irradiation, ultraviolet light-, in Chinese hamster cells in G_2 or S-phase, enhancement of post-replication repair in 71
—, ultraviolet, model for postreplication repair in mammalian cells after 247

Laser Raman light-scattering observations of conformational changes in myosin induced by inorganic salts 349
Lecithin bilayers, density measurements and molecular interactions 159
Light scattering, quasi-elastic, from migrating chemotactic bands of *Escherichia coli* 15
—scattering, laser Raman, observations of conformational changes in myosin induced by inorganic salts 349
Lipid bilayer membranes, black, formation from glyceryl monooleate dispersed in squalene 337
— bilayers, structure determination of 407
Lipid membrane, bilayer, effect of ultrasound 33
Lipid-water smectic phase, water and thermal diffusivity in 427
Lorentzian, one-term, and sharpening of the noise power spectrum 485

Mammalian cells after ultraviolet irradiation, model for postreplication repair in 247
Membrane, lipid bilayer, effect of ultrasound on 33
—, black lipid bilayer, formation from glyceryl monooleate dispersed in squalene 337
—, nerve and cardiac, sodium conductance measured by $\dot{V}_{max}$ 153
Metal ion effect in shear inactivation of urease 121
Midgut, insect, epithelial potassium active transport system of, pump-mediated efflux in 313
Molecular interactions and density measurements, lecithin bilayers 159
— mechanism of energetic coupling of sequence of electron transfer reactions to endergonic reactions 451
Monooleate, glyceryl, dispersed in squalene formation of black lipid bilayer membranes from 337
Muscle fiber, skeletal, containing helicoidal T system, electrical properties 277
Myosin, conformation changes induced by inorganic salts, laser Raman light-scattering observations of 349
Myxicola, internal cesium alters sodium inactivation 473

Nerve and cardiac membranes, sodium conductance measured by $\dot{V}_{max}$ in 153
— and cardiac tissues, sodium current measured by $\dot{V}_{max}$ 147
Noise power spectrum, sharpening of, and one-term Lorentzian 485
Nucleus critical size and reaction order, in sickle hemoglobin gelation 129

One-term Lorentzian and sharpening of the noise power spectrum 485

Permeability, potassium, of human erythrocyte ghosts and changes of intracellular Ca^{++} as measured by arsenazo III 463
Photochemical cycle of bacteriorhodopsin, primary intermediates in 375
Photosynthesis, bacterial, picosecond dynamics of electron-transfer processes in 207
Physical-chemical basis of protection of slowly frozen human erythrocytes by glycerol 101
Picosecond and steady state, variable intensity and temperature emission spectroscopy of bacteriorhodopsin 383
— dynamics of electron-transfer processes in bacterial photosynthesis 207
Potassium active transport system of insect midgut, epithelial, pump-mediated efflux in 313
— permeability of human erythrocyte ghosts,

and changes of intracellular Ca^{++} as measured by arsenazo III 463
Power spectrum, noise, sharpening of, and one-term Lorentzian 485
Prediction, conformational, and circular dichroism studies on ribosomal protein S4 from *Escherichia coli* 359
Pronase-treated and normal squid giant axons, local anesthetic block of sodium channels in 285
Protein S4, ribosomal, from *Escherichia coli*, conformational prediction and circular dichroism studies on 359
Proteins, folded, models for hydrogen exchange from 79
Pump-mediated efflux in epithelial potassium active transport system of insect midgut 313

Raman light-scattering laser observations of conformational changes in myosin induced by inorganic salts 349
Rana pipiens rod outer segments, birefringence measurements of structural inhomogeneities in, 59
Replication, post-, repair in mammalian cells after ultraviolet irradiation, model 247
—, post-, repair in ultraviolet-light-irradiated Chinese hamster cells by irradiation in G_2 or S-phase, enhancement of 71
Ribosomal protein S4 from *Escherichia coli*, conformational prediction and circular dichroism studies on 359
Rod outer segments of *Rana pipiens*, birefringence measurements of structural inhomogeneities in 59

Salts, inorganic, laser Raman light-scattering observations of conformational changes in myosin induced by 349
Scattering observations, laser Raman light-, of conformational changes in myosin induced by inorganic salts 349
Sharpening of the noise power spectrum, and one-term Lorentzian 485
Shear deformation effects in enzyme catalysis, metal ion effect in shear inactivation of urease 121
Sickle hemoglobin gelation, reaction order and critical nucleus size 129
Skeletal muscle fiber containing helicoidal T system, electrical properties 277
Smectic phase, lipid-water, water and thermal diffusivity in 427
Sodium channels, local anesthetic block of, in normal and pronase-treated squid giant axons 285
— conductance in nerve and cardiac membranes measured by $\bar{V}_{max}$ 153
— current measured by $\bar{V}_{max}$ in cardiac and nerve tissues 147
— inactivation in *Myxicola*, internal cesium altering 473
Solvent-free black lipid bilayer membranes, formation from glyceryl monooleate dispersed in squalene 337
Spectra, emission polarization, and fluorescein excitation in living cells, changes during cell cycle 395
Spectroscopy, variable temperature emission, and variable intensity of bacteriorhodopsin, picosecond and steady state 383
Spectrum, noise power, sharpening of, and one-term Lorentzian 485
Sperm flagella, equation of motion for 177
— heads, hydrodynamic orientation for flow cytometry 7
Spreading cortical depression, mathematical model for 257
Squalene, formation of black lipid bilayer membranes from glyceryl monooleate dispersed in 337
Squid giant axon, temperature effects on gating currents in 479
— giant axons, normal and pronase-treated, local anesthetic block of sodium channels in 285
Steady state and picosecond, variable intensity and variable temperature emission spectroscopy of bacteriorhodopsin 383

Temperature dependence of survival of human erythrocytes frozen slowly in various concentrations of glycerol 89
— effects on gating currents in squid giant axon 479
— emission spectroscopy and intensity, variable, of bacteriorhodopsin, picosecond and steady state 383
Thermal and water diffusivity in lipid-water smectic phase 427
Tissues, cardiac and nerve, sodium current measured by $\bar{V}_{max}$ in 147
Transfer reactions, electron, to endergonic reactions, molecular mechanism of energetic coupling of 451
Transport system, active, of insect midgut, epithelial potassium, pump-mediated efflux in 313

Ultrasound effect on bilayer lipid membrane 33
Ultraviolet irradiation, model for postreplication repair in mammalian cells after 247
— light-irradiated Chinese hamster cells by irradiation in G_2 or S-phase, enhancement of post-replication repair in 71
Urease, metal ion effect in shear inactivation of 121

Ventricular wall, dynamics of, and observations on blood flow 233

Water and thermal diffusivity in lipid-water smectic phase 427

Yohimbine and batrachotoxin interaction 219
